

i {E govor} bullet & sticks "Bio-HAZARD", "DANGER"
 Center { man falls, left leg bent wrong, metal
 - woman from N
 - "Subberwocky, ... out, ... broken vial, ... slammed door"

turn on switch (light)
 - "All staff returning to normal"

Screen: "Last may out: Problems reached critical level - complete evacuation arranged
 - do not attempt further contact in any manner - research must be considered destroyed
 - Telerus project failed - project "Babel" failed - out.

touch E bulkhead: flashback

3 people (dark hair man, woman, blond man)
David
wants knowledge

touch bulkhead @ Entry Area

4 people (dark hair man, woman, older man all greet blond man
D. Brett Owen | D. Alexis | Jonas | Dr. Telurien
str technologist | Stevenson
(slight limp) | bio-tech

Jonas presses panel on wall (looks like a tile) & NW door opens

Brett's Rm (w: ext, n: bathroom) Bathroom - mirror is shattered

wrecked, sheets, mattress, dresser, bookcase, books, junk

ID card ("Owen's") glass shards on floor bible index

"Warning. Main Power Supply low"

Jonas' Rm (e: ext, s: bathroom) Bath - shower, sat. toilet, shattered mirror (blood on cuts)

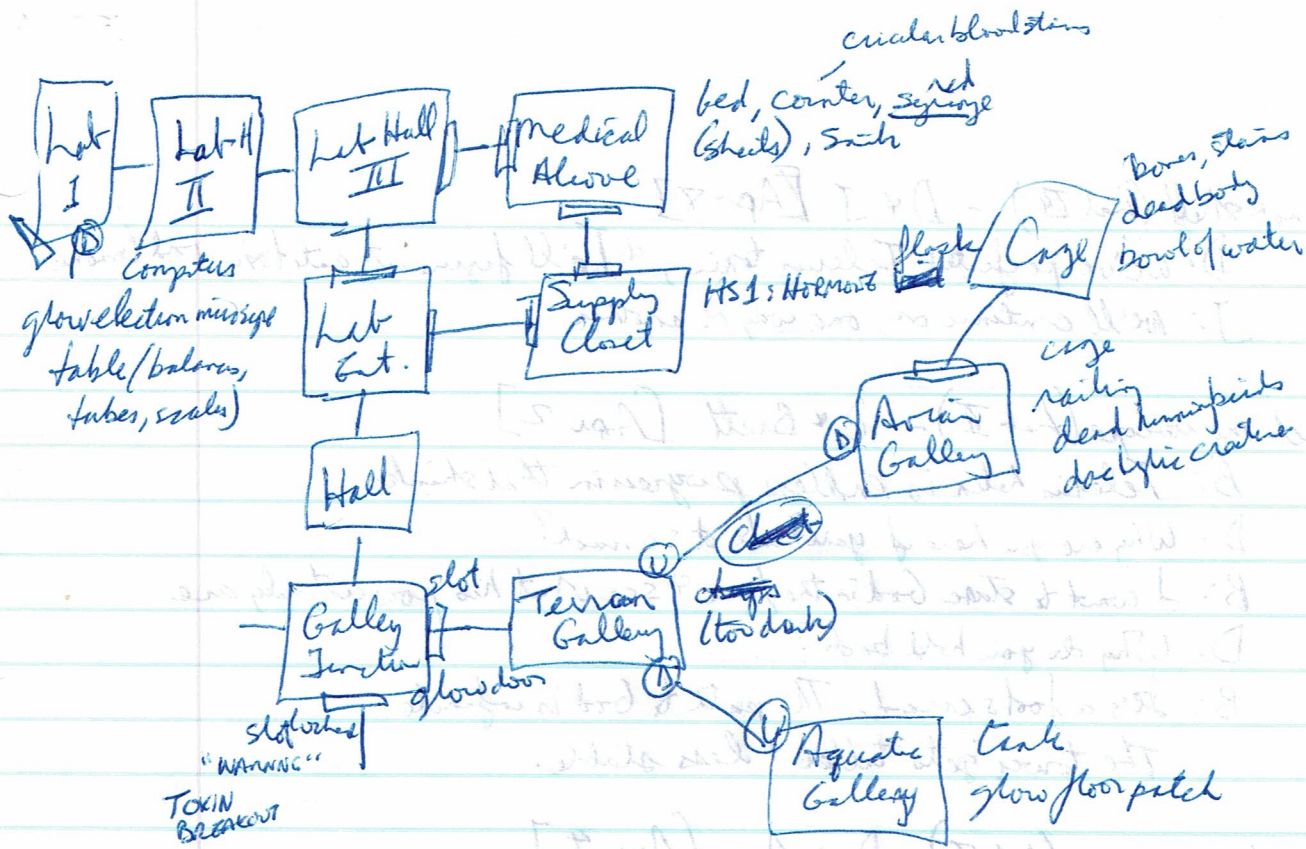

bed, sheets, roll-top desk, dresser, bookshelf
'flatter "80" (locked)
on orange ink

Records I (ledge, 3 chairs, screen, keyboard, printers)

Screen: Hello. My name is HOSGA; I am the data storage/retrieval device for the Babel Project. Ask me abt topics.

Records II (ledge, papers, devices, screen, safe)
red dial (1-100)

turn dial to 80 → metal key on glowing shelf

touch door (Gally Junction) - Jonas & Brett argue how to test Teleus, [Apr 7] mind could be twisted by time of telluric activities.

Brett's card doesn't work in E slot or S slot (power was off)
At E end → wedge bulkhead with pole.

Lab Hall III - 3 cages (glass), instruments, papers, cabinet ^{lock, hinges, ring}
↑ dead mice

touch cages - Jonas notes mice's dilated eyes, later one mouse savagely attacks other mice
↑ [Apr 6]

pour acid on hinges → cabinet { notes, glowing shelf, base vial }
notes - Teleus toxin & anti-toxin base must be thoroughly mixed, & then radiated (level unspecified) to create anti-toxin.
Inject ~~the~~ anti-toxin ASAP before it re-separates.

Lab I - amber syringe, 2 open jars on table, pair of glowing microscopes
- bulkhead (release lever & small bluish green light)

touch shell (Lab II) - D & J [Apr 8]

D: we've perfected Telerus toxin, & I'll figure out anti-toxin real soon

J: we'll continue on, one way or another

touch microscope (Lab II) - D & Brett [Apr 2]

B: Telerus helix is endless progression that shinkes

D: Why are you here if you hate it so much?

B: I want to stare God in the face & see what his powers truly are.

D: Why do you hold back?

B: It's a fool's errand. The path to God is infinite
The tower gets taller & less stable.

touch microscope (Lab I) D & A [Apr 4]

- tall cylinder with white mist

- D takes small violet something from cylinder

- D made hills for A, for her birthday.

Lab Hall 3

Changing
Rm

red suit
shower area
bench
hooks
Smell of soap,
sweat & feces

Heating

Radiation
Area

glass hatch,
control panel
{ blk button "RADIATE"
blue button (thermometer)
white switch
dial (1..600)
cut slot (green) }

looking in mirror increased telluric powers?

D's Rm: bookcase now glows.

touch bookcase - D is crying, A comforts [Apr 22]

D talks about black out, power, rage

A says I decided to admin antitoxin in a few days,

then says no, J says experimental must be finished no matter what,
& to lock you in your room until he needs you.

She takes D's key + ID card & leaves. D breaks bookcase.

Brett's mattress now glows. (J & A search room for main gate codes) [Apr 25]

J says he needs code to change it, to prevent B's return.

J: "show me the note again" → throws note into corner

A: B gave letter to me in middle of night.

m. radiation (414) is needed to mix antitoxin

J: Jabberwocky toxin released in sample gallery where Teleus is

J: key to cabinet containing antitoxin base is destroyed.

note: Brett explains that he can't stay an hour more & taking a helicopter.

Jonas' blotter glows (B, J, A fight) [Apr 21]

A: you have no right to refuse D the anti-toxin!

J: our orders are to continue the test. Only placebos allowed.

J also tells B to watch A and report to him

[Apr 11] Jonas' mirror (J - see letting his guard down, prays "where are the answers?")

Dining table glows (all 4) [Apr 12]

J asks for a volunteer for Teleus. D volunteers, J will begin tomorrow.

Medical Above sink: (D in gown, B disinfects, J talks, A here) [Apr 13]
- syringe filled with Telerus toxin + injected in D's left arm

Radij @ Avion (D + A) [Apr 7] What if we had wings
done - filters (controlled in the hall (?)

panel (in Golly Junction) POL. FILTERS A/C UNIT
3 sliders (red, green, blue), button "ACCESS"
are set to 1 1 2 (can be set 1, 3) ~~button~~
push button, slide green slider to 3

Aquatic patch: J and Thorne [Feb 2]
Thorne is rebelling against human tests for Telerus
J pushes Thorne to his death, to replace him.

Beach in Changing Room: (B + D changing out of suits to uniforms) [Apr 20]

D crumples, then grows, collapses.
B prays; then D attacks; B escapes + slams door.
D slams into door "What is happening to me?"
take suit → green plastic cut in pocket "SAFETY"

wearsuit to enter Toxin Gallery brackets, metal frame, panels
"CORPUS MORTIS"

vial - "Telerus Toxin"

open telerus vial, put telerus in flask
open base vial, put base in flask
close flask, shake it.

blue button (water jets)

final memory in Contyrd → you killed J + A.

ask H abt filters: Galley lenses: ^{light} can be blocked by setting any two of the three lenses to the same alignment

Optum toxin: liquid base toxin; stops brain fn when swallowed (no neurotransmission)

ask H abt Babel

- str constituted by Administrative Agencies for bio experiments.

- str has 4 scientists; ~~air supply~~ provisions air-dropped monthly.

- residential area, lab hall, specimen galley

~~Dr. David~~ David Felurian: most recent member, replaces Dr. Brian Thorne; no specialization

Dr. Brian Thorne: dead; specialized in genetic manipulation

Galley: light controlled by aligned large polarizing filters, controlled near door. 2nd galley on toxins/viruses.

Virus: Babel has designed several, recent: Rubella ZII, also formulated vaccines to several natural pathogens

Rubella ZII: 300 times faster than rubella; kills in 2 hrs.

Lab Hall: below is a compact, medium power, radiation chamber

Radiation - chamber capable of admin low- to mid-level radiation to its contents

Admin. Agency - governing body for Western Bloc

Western Bloc - alliance of N. America, S. America, W. Europe.

Dr. Alexis Stevenson - spec: biotechnology

Dr. Jonas Bitten - senior. Spec: data analysis, viral biology

Dr. Brett Owen - sci & str designer. Tech specialization

Areas of experimentation - Babel supports wide range of bio experiments

Televis - Toxicology 4885 (Human can see & hear short & strongly charged episode by touching an imprinted object!)

look up Babel in bible: Genesis 11:4 (chapter & verse numbers are circled)

god - great day of the lord's ree

David - young man slayed Goliath, powerful but corrupt king

~~hosea~~ Hosea - prophet (led to treachery against the lord, & gotten strange children)

Ask H abt Jetterwocky - fatal gastoxin. Dense, spreads very slowly.

Inhalation of 10 mg causes lung mucous to acidify.

(human) HST: Hysterical Strength Hormone.

Safe for human use; short-term super-strength.

touch shelf in safe @ Records II

(Jonas & Alexis)

- doors closed, water off, tells Alexis to go to helicopter in courtyard;
- he's send final msg & turn off power, then set lock.
- 2 devils loose now.

Key: RESIDENTIAL MASTER.

David's km - dresser, bed, table, bookshelf, blood trail, e: bathroom
(glows)

(door slammed so
violently its
embedded!)

touch table (David & Jonas)

- no frame here; reward from the work itself
- Brian did not die of natural causes; he died ~~working~~ here
- he leapt from top balcony of specimen gallery to floor below

Alexis' Room - desk, bookcase, dresser, bed, vase, w: bathroom
(glows)

touch vase (David & Alexis tuckling each other on bed; someone enters)

bookcase (locked, books, ^{scraps} loose papers, notepads)

dresser (sketch book) many drawings of David

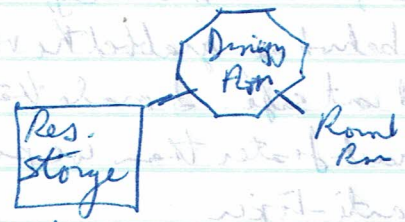

bath (shattered mirror, glowing toilet)

touch toilet: Alexis with razor, abt to cut arm

"To be or not to be". Then Jonas calls her.

She throws razor into toilet. "Someone has got to go on"

counter (glow), appliances, cabinets,
table & chairs, calendar (was placed

take calendar → made dates of visors!

shelves,
segment,
pegboard (glow, screwdriver)
vent (cold & damp)
bush shelves → support bar (6')

Calendar

- Mar 7, Entry, David arrives at Babel station
- Mar 7, David's Rm, Jones explains station to David.
- Mar 20, A's Rm, David jokes c̄ A
- Mar 30, E Gnd, Brett, D & A discuss fear.
- Apr 24, Cdr, Brett runs in, babbling about the fabberwozky
- Apr 25, A's Bath, A contemplates suicide
- Apr 28, Records II, J & A get ready to escape
- Apr 29, Dining, J insists on finishing the experiment.

which
cont
-8'

touch counter: Brett sitting, Jones fixing Brett's metal leg, Alexis paces.

B: can't believe it. just slipped in behind me, grabbed the vial, threw it down + ran. David isn't safe. I made that toxin

J: mental deterioration is much faster than we presumed.

A: you refused to admin the anti-toxin

J: you were to make sure creature was confined?

A: I did

J: How did it get out?

A: Possible I didn't check lock when I brought him his last meal.

B: We must nullify fatberwocky formula, then admin anti-toxin...

J: No. The test will run its full cycle.

B: But... fatal toxin... homicidal thing in halls...

J: David is certainly lost, our orders have not changed...

B: God have mercy on you (stumbles out)

touch pegboard (A stacking cans, D in awe.) (Mar 7)

D looking forward to pure research without guidelines or strictures
